palletizing technology

“Carefully designed,
optimizing resistance and durability”

ROBOSAC P₄

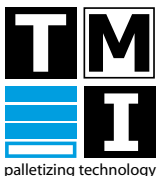

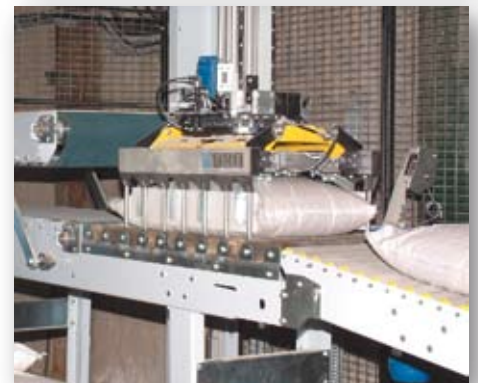

> CARTESIAN PALLETIZER

TMI equipment allows the customer palletizing a wide range of products in several formats in different output levels.

A careful choice of materials, including high resistance steel for moveable parts, guarantees the highest quality for loaded pallets, optimizing mass and avoiding inertias.

■ Characteristics:

- > Optimization of occupied space.
- > It allows its placing in reduced sites.
- > Back is discharged through a grip. It allows bags overlapped each other. Grip is designed according to the bag and pattern type.
- > Versatile systems to handle different packages.
- > Motion positioning by means of numerical control (CNC).
- > Telescopic arm can be optionally equipped in order to reduce the machine height.
- > ATEX version under request. >>
